The program allows you to process the salaries for the same amount of employees as stated on the license bought. The amount on the license does not depend neither on the number of companies nor the number of installations. It always refers to the total number of all employees to whom the salaries in specific month are calculated.

The license might be extended by number of employees as multiples of five. You will only pay for the difference between the set program that is used and the one you need. It is possible to switch from the Standard package to the Professional package and the difference in price of the new and the current package must be paid. When switching from the Standard package to the Professional accounting company package, it is necessary to switch to the Professional package first. The switch from the Professional package with more than 50 employees to the Professional accounting company package is for free. When switching from the Professional package with less than 50 employees to the Professional accounting company package, it is necessary to enlarge number of employees at least to 50 and the price would be 15⁵³ € excl. VAT/employee (18⁴⁸ € incl. VAT, 556⁷³ Sk incl. VAT).

Standard

The set is suitable for companies where one user processes salaries in the program. There is an option to run salary agenda for more companies in the set. In this set the program can be installed on two computers whereas one user is fully authorized to use the program, the other just to review.

Professional

Set is suitable for companies, where the salaries in the program are processed by more users with different access privileges. There is option to run salary agenda of more companies in the set. In one database (company) maximum three users can work at once and program can be installed on maximum 4 computers.

Professional accounting firm

with 40% discount

It has the same functions as the Professional package and it is suitable for accounting companies that process wages for other companies externally and this activity is recorded in their business objective. If this package is purchased, 40% discount from the price of the OLYMP Professional package will be provided and the size of the license is at least for 50 employees. 40% discount will apply also to expansion of this package. The package is supplied only with a hardware key and it is necessary that all computers with OLYMP program were connected to a local network. Price of the support package is calculated from original (without discount) price of the OLYMP Professional package.

Description of modules and services

Personal module

Contains data about employees (personal, family, work, salary, others) with option to assign employees to departments and pay-out units. Enables to register other personal and salary data as well (about vacation, salary components, salary deductions of the employee) that are used as basis for salary calculation.

Salary module

It enables to calculate the salary according to its set components that are optional for selection from summary salary scheme. It can also process benefits for other types of employment (performance contract, brigade-work of a student, agreement on working activity) of statutory representatives and partners. It calculates the average for vacation and sickness automatically. It enables accounting of salaries according to centers or orders, as well as according to single-entry-bookkeeping or double-entry-bookkeeping. It contains calculation of annual tax accounting and health insurance accounting.

Print and export module

Contains cca 150 different print sets that enable to print and export. The print outcome set by law (reports, applications, cancellations from insurance companies, quarterly overview for tax authority) as well as transfer orders (for selected banks in the SR) are included as originals whereas the program allows you to print in the original itself.

Export module allows you to export the printouts set by law (reports, applications, cancellations from insurance companies...) or other exports, e.g. to single-entry bookkeeping (ALFA), potentially export of account coding to double-entry bookkeeping.

Module of attendance

It enables you to connect the program OLYMP with attendance system. It supports automatic transmission of most of the data of attendance system. Thanks to import, it is possible to add new salary components (hourly, monthly salary, salary compensation during sickness absence, absence, vacation...) to salaries automatically altogether with its duration period. In addition, it is possible to assign this data to the salary components that are added in Personal module. Providing that attendance system enables to enter also appropriate amount to individual salary components as well as structuring to centers and orders, this data will be reflected in salaries as well.

Network

Network version of the program enables various users in shared databases to work in the same time whereas maximum three users can work in one database at once.

Access rights

The program supports the settings of various rights for every user. Each user has to login to the program with his/her name and password and can carry out only such operations that were selected for him.

A packet of support

20% from the price of bought program modules

The seller provides the user with a Packet of Support. Within it the user can:

- Upgrade the program via free downloading from the web page or for the manipulation fee price via CD-ROM.
- Use HOTLINE services – counselling with any questions regarding the program.

The Packet of Support is always valid for 1 year while by buying the program it is offered free of charge for the first year. If the customer does not have a valid Packet of Support he/she can continue using the program but temporarily it cannot be upgraded and the HOTLINE services cannot be used.

OTHER SERVICES

more on www.kros.sk

At request, the seller provides the user also with service, different kinds of trainings, counselling and other services. Some of the services can be provided directly at the client's. For more information click www.kros.sk.

INTRODUCTION TRAINING FREE OF CHARGE

more on www.kros.sk/skolenia

Each client has the right to participate in the introduction training within 3 months after purchase of the program free of charge. The trainings take part in the seats of KROS. You can find more information including actual schedule and a possibility of registration on www.kros.sk/skolenia.

SUPPORT OF SCHOOLS

more on www.kros.sk/podporaskol

KROS offers a possibility to any school or educational institution to participate in a free project School Support. Within that, a school version of the program is provided, as well as user's manuals, trainings and other advantages. The school version has a limitation that does not allow keeping records dated July and August. For more detailed conditions click www.kros.sk/skolskeverzie.
